

August 28, 2008

Dear Mr. Nick Glova:

We wanted to take some time to recap our experience with Nicholas Electric during the recent electrical upgrade of our home. As you recall, when we first discuss the project five months ago, we recognize the complexity of upgrading this home with significant historical and architectural value.

To our relief and delight, the team at Nicholas Electric performed in a stellar fashion. They were professional, diligent, prompt with clean-up, and most importantly, creative in their approach in minimizing plaster damage and extremely attentive to details and instructions.

We have no hesitation in recommending your services. The historical home owners of Pittsburgh are truly fortunate to have such a skilled and dedicated team of electricians working right in their backyard.

Our sincere gratitude,  
Drs. Raymond and Edwina Benza
